## INTRODUCTION

This report gives final figures from the 1971 Census on labour market activity for persons 15 years and over, for Canada and provinces. Table 13 shows age groups, classified by sex, labour force activity and period last worked. Table 14 shows marital status and age groups, classified by sex and work experience.

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

In 1971 for most areas the self-enumeration method of collecting data replaced the canvasser approach. Basic data on the labour force were collected from every third household for persons 15 years and over from the following question:

31 (a) How many hours did you work for pay or profit last week?

(b) Last week, how many hours did you help without pay in the operation of a family business or farm?

(c) Did you look for work last week?

(d) Last week did you have a job from which you were on temporary lay-off?

(e) Last week did you have a job or business from which you were absent because of illness, vacation, strike, training course, etc.?

**Comparability with earlier censuses:** In the 1971 Census the term "labour force activity" was used for the first time. It replaces the term employment status (employed, unemployed and not in the labour force) used in 1951 and 1961.

In 1961, labour force activity was confined to information on persons with a job or, if none, looking for work, in the week prior to enumeration. Persons on temporary lay-off were to be included in the latter group. Some evidence exists that enumerators incorrectly included some of those on temporary lay-off in the group "with a job last week". Other problems of non-comparability with the 1971 data may exist due to the use of different questions, and methodology (self-enumeration vs. canvasser).

**Comparability with the Labour Force Survey:** The Labour Force Survey is inclusive of 14-year olds and exclusive of residents of the Yukon and Northwest Territories, Indians on reserves, members of the Armed Forces, overseas households and inmates of institutions. Though the underlying labour force concepts used in the 1971 Census and the monthly survey were designed to be as consistent as possible the above differences in coverage plus different methodology, questions and operational procedures result in some loss of comparability of data. Further information on the comparison of Census and Labour Force Survey data is available in the introductory report to this volume (Catalogue No. 94-771) or in the Population and Housing Research Memorandum (PH-EC-4) previously referenced.

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official population counts (see Catalogue No. 92-715).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Ce bulletin présente les chiffres définitifs du recensement de 1971 en ce qui concerne l'activité sur le marché du travail des personnes de 15 ans et plus, pour le Canada et les provinces. Le tableau 13 donne les groupes d'âge selon le sexe, l'activité et la date du dernier travail. Le tableau 14 indique l'état matrimonial et les groupes d'âge selon le sexe et les antécédents de travail.

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

En 1971, dans la plupart des régions, le recensement par représentant a fait place à l'autodénombrement. Les données de base sur la population active ont été recueillies auprès d'un tiers des ménages pour les personnes de 15 ans et plus, qui devaient répondre à la question suivante:

31 a) Combien d'heures avez-vous travaillé la semaine dernière contre rémunération ou en vue d'un bénéfice?

b) La semaine dernière combien d'heures avez-vous aidé sans rémunération à l'exploitation d'une entreprise ou d'une ferme familiale?

c) Avez-vous cherché du travail la semaine dernière?

d) La semaine dernière aviez-vous un emploi dont vous aviez été congédié temporairement?

e) La semaine dernière aviez-vous un emploi ou une entreprise dont vous étiez absent à cause de maladie, de vacances, d'une grève, d'un cours de formation, etc.?

**Comparabilité avec les recensements antérieurs:** Au recensement de 1971, le terme "activité" a été utilisé pour la première fois. Il remplace la désignation "état d'emploi" (employé, chômeur ou inactif) utilisée en 1951 et 1961.

En 1961, les données sur l'activité se limitaient aux personnes ayant un emploi ou cherchant du travail la semaine précédant le dénombrement. Les personnes en congédiement temporaire étaient comprises dans ce dernier groupe. Selon certains indices, des agents recenseurs ont erronément inclus certaines personnes en congédiement temporaire dans le groupe de celles qui avaient un emploi la semaine précédente. D'autres problèmes de non-comparabilité peuvent exister en raison de la différence des questions et de la différence de méthodologie (autodénombrement contre recensement par représentant).

**Comparabilité avec l'enquête sur la population active:** L'enquête sur la population active englobe les personnes de 14 ans, mais ne tient pas compte des résidents du Yukon et des Territoires du Nord-Ouest, des Indiens dans les réserves, des membres des Forces armées, des ménages outre-mer ni des pensionnaires d'institution. Les concepts fondamentaux d'activité utilisés au recensement de 1971 et dans l'enquête mensuelle se veulent aussi convergents que possible, mais les différences de champ d'observation mentionnées ci-dessus et les différences de méthodologie, de questions et de procédure réduisent la comparabilité des données. On peut obtenir plus de renseignements sur la comparaison des données du recensement et de l'enquête sur la population active dans l'introduction de ce volume (n° 94-771 au catalogue) ou dans la Note de recherche sur la population et le logement (PH-EC-4) citée plus haut.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données sont intégrales. Bien entendu, ce sont ces dernières données qui représentent les chiffres officiels de population (voir la publication n° 92-715 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

## DEFINITIONS

**Labour force activity**—Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e., working for pay or profit or in unpaid family work, looking for work, on temporary lay-off, or with a job but not at work.

**Employed labour force:** Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, worked for pay or profit, or in unpaid family work. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc. (provided they were not also looking for work).

**Unemployed labour force**—The unemployed consists of all non-inmates 15 years and over, who, during the week prior to enumeration, were **not** working but were looking for work, or were on temporary lay-off, or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

**Not in the labour force:** Refers to all persons 15 years and over not classified as members of the labour force. Most persons in this category are students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, and persons who cannot work because of long-term physical or mental illness or disability, including inmates of institutions.

**Age:** Classifications are based on the number of completed years of age at last birthday prior to June 1, 1971.

**Marital status** (i.e., single, married, widowed and divorced): Totals shown under the heading "Married" include all married persons whether living together or living apart for any reason unless a divorce has been obtained.

**Work experience**—Refers to work experience prior to the census date derived from information on "when last worked" and on whether or not the person worked in 1970 as indicated by the reporting of some weeks worked in 1970.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 94-771). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

## DÉFINITIONS

**Activité:** Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement (travaillant contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, cherchant du travail, en congédiement temporaire, ou ayant un emploi mais n'étant pas au travail).

**Population active occupée:** Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. (pourvu qu'ils n'aient pas également cherché du travail).

**Population active en chômage:** Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, **ne travaillaient pas** mais cherchaient du travail, ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades, ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable disponible dans la localité.

**Inactifs:** Toutes les personnes de 15 ans et plus qui ne font pas partie de la population active. La plupart des personnes de cette catégorie sont des étudiants, des maîtresses de maison, des retraités, des travailleurs saisonniers recensés en saison morte et ne cherchant pas de travail, ou des personnes qui ne peuvent travailler en raison d'une maladie ou d'une infirmité physique ou mentale de longue durée, y compris les pensionnaires d'institution.

**Âge:** Nombre d'années révolues au dernier anniversaire avant le 1<sup>er</sup> juin 1971.

**État matrimonial** (c.-à-d. célibataire, marié, veuf et divorcé): Le total "Mariés" comprend toutes les personnes dont le conjoint est vivant, qu'elles vivent ensemble ou qu'elles soient séparées pour quelque raison que ce soit, à moins d'avoir obtenu un divorce.

**Antécédents de travail:** On détermine les antécédents de travail à partir des renseignements recueillis sur la date du dernier travail recoupés avec les renseignements obtenus sur le nombre de semaines travaillées en 1970.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas connues au moment de la publication. Elles seront disponibles dans l'introduction de ce volume (n° 94-771 au catalogue). Les utilisateurs désireux de connaître ce renseignement avant la publication du bulletin d'introduction devront s'adresser au Service-utilisateurs du recensement.

## Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

### Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

### How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

### Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

### Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

### Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.

## Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

### Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

### Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

### Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaries". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Secteur du recensement, Statistique Canada, Ottawa K1A 0T7.

### Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. Il faut envoyer les demandes au Service-utilisateurs des données du recensement en précisant bien les classements ou recoupements et les régions géographiques. Il faut inclure les catégories exactes pour chaque caractéristique et une ébauche de la disposition des tableaux.

### Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs du Secteur du recensement de Statistique Canada.
